

Hollyland Delivers Solidcom C1 Pro With ENC Technology To Awaken Church

— An Effective Communication Intercom System

▶ Testing Background

The Awaken Church production team was looking for a solution to overcome the communication challenges in high-noise environments. Hollyland invited the team to test a new wireless intercom system — the Solidcom C1 Pro with cutting-edge ENC technology. After several tests, the Awaken Church's production team fell in love with and began using it for daily communication.

▶ Testing Conditions

- Church Capacity: About 1,200 people
- Product: Hollyland Solidcom C1 Pro - 8S (8-person headset intercom)
- Recommendation Parameters: Flexibility, portability, and ENC
- Frequency of Use: 2-4 times a week
- Participants: Camera operators, producers, and other staff

「 First Impression 」

“The entire system packs down so small, I couldn't believe it”

“Price point is ideal, and the mobility of the system makes it a no brainer for us” — Awaken Church

Only 170g (6oz) including the headset and battery

“Extremely **compact**, best I've ever seen in that department”

1,100ft (350m) long-distance communication, 10-hour remote headset battery life

“**Outdoor performance** is amazing. we were easily 500ft away through walls and still heard everyone perfectly and the headset has **great battery life**”

User Experience

Auto-pairing out of the box

“**Ease of use** is incredible, we just turned them on and everything worked instantly”

Environmental noise reduction by 20dB with dual-mic ENC technology, one-press TALK/MUTE button, push-to-talk (PTT)

“If your team makes a good habit of muting their mics when not speaking or utilizes the push to talk function, the **noise cancelling** is amazing”
